Switchman Meets Terrible Death While Riding on Locomotive of Southern Pacific Railroad.

(Special to The Herald-Republican.) Ogden, May 11 .- Thrown directly in front of a switch engine on which he was riding by the sudden turning of a loose plank, George Hines, a Southern Pacific switchman, was cut to pieces under the wheels of the engine at Carlin early this morning, dying of his injuries at 1 o'clock this afternoon on the operating table. Both legs were cut off, his right arm was crushed to a pulp, several ribs were broken and internal injuries sustained. Hines was rushed to his home, where Southern Pacific officials attended him. He was conscious, and suffered terrible pain until within an hour of his death.

Hines had placed a loose plank on the rear of the engine tender, intending to take it home for kindling wood. He was standing on the plank while the switch engine was backing down the yards at considerable speed. A sudden curve caused the plank on which he was standing to turn, throwing him between the rails directly in front of the engine. Both the tender and the engine passed over him. Hines was a married man, and had several children.

Hartford, Conn., May 11 .- "The two nost trying problems that the third Hague conference will face are those of the inviolability of ocean commerce in war and the limitation of armaments."

Thus declared Edwin D. Mead, director of the international school of peace, Boston, in addressing the New England arbitration and peace conference today. He continued:

"The question is now a great moral one. The arguments for the great armaments, especially for the great navies which are now vastly more a danger than a defense, are not respectable arguments.

"It would surely be hard to con-ceive of anything worse than the jingoism and hucksterism of the recent speech of the secretary of the navy at Philadelphia, urging a bigger navy to prevent our being 'trodden upon' by other nations, and to make more business for the steel trust.'

In comparison with this, Mr. Mead read former President Roosevelt's Nobel prize address, in which he pointed out that there was no insurmountable difficulty.

# S.S. UNEQUALED FOR BAD BLOOD

Normal, healthy blood contains millions of tiny red corpuscles, which are the vitalizing and nourishing element of the circulation. These corpuscles are constantly forming in healthy systems by the extraction of nutriment from food eaten, and this nourishment is then supplied through the circulation to every portion of the system. Any system which does not receive the proper amount of blood nourishment is not prepared to withstand the countless disorders that assail it. Bad blood can not nourish the body, the circulation must be pure, rich and strong if we would enjoy good health. Bad blood manifests itself in various ways. With some it takes the form of skin diseases and eruptions, others become bilious and malarious, with sallow complexions, torpid liver, etc. If the germs and impurities in the blood are of a more virulent nature then bad blood becomes more serious and produces Rheumatism, Catarrh, Sores and Ulcers, and like troubles. Nothing equals S. S. S. for bad blood. It is Nature's own blood purifier, made from roots, herbs and barks. It goes into the circulation and removes every impurity or poison, strengthens and enriches the blood, and in this way supplies the ody with the proper amount of nourishment to maintain good health. S. S. S. is likewise the finest of all tonics and while purifying the blood builds up every portion of the system. S. S. S. cures every ailment coming from bad blood, and it does so simply because it purifies the circulation. Book on the blood sent THE SWIFT SPECIFIC CO., ATLANTA, GA. free to all who write,
